

Store Clothing Care Guide

With our clothing products being personalised, we appreciate that you'll want them to last as long as possible. Following these guidelines will help you to get the most out of your clothing. Because your garment is customised it's not as simple as reading the care label which is stitched in the garment. In addition to the care label instructions please ensure the following:

- Wash inside out - this helps to protect the customisation from getting damaged, close zips and check pockets are empty
- Wash at 30°C
- Do not use bleach or harsh detergents/fabric conditioners
- Do not overload the washing machine
- Wash with similar colours and similar textured garments, at least for the first few washes as colours can run.
- Dry immediately after washing - do not leave garments wet
- Do not tumble dry
- Do not dry clean
- Iron inside out using the lowest heat setting, this is especially important for printed products
- It's best to wash a new garment before its first use

We understand that for certain items, particularly workwear worn in harsh conditions, washing will need to be at a higher temperature.
